Tools and Technologies

HIBERNATE

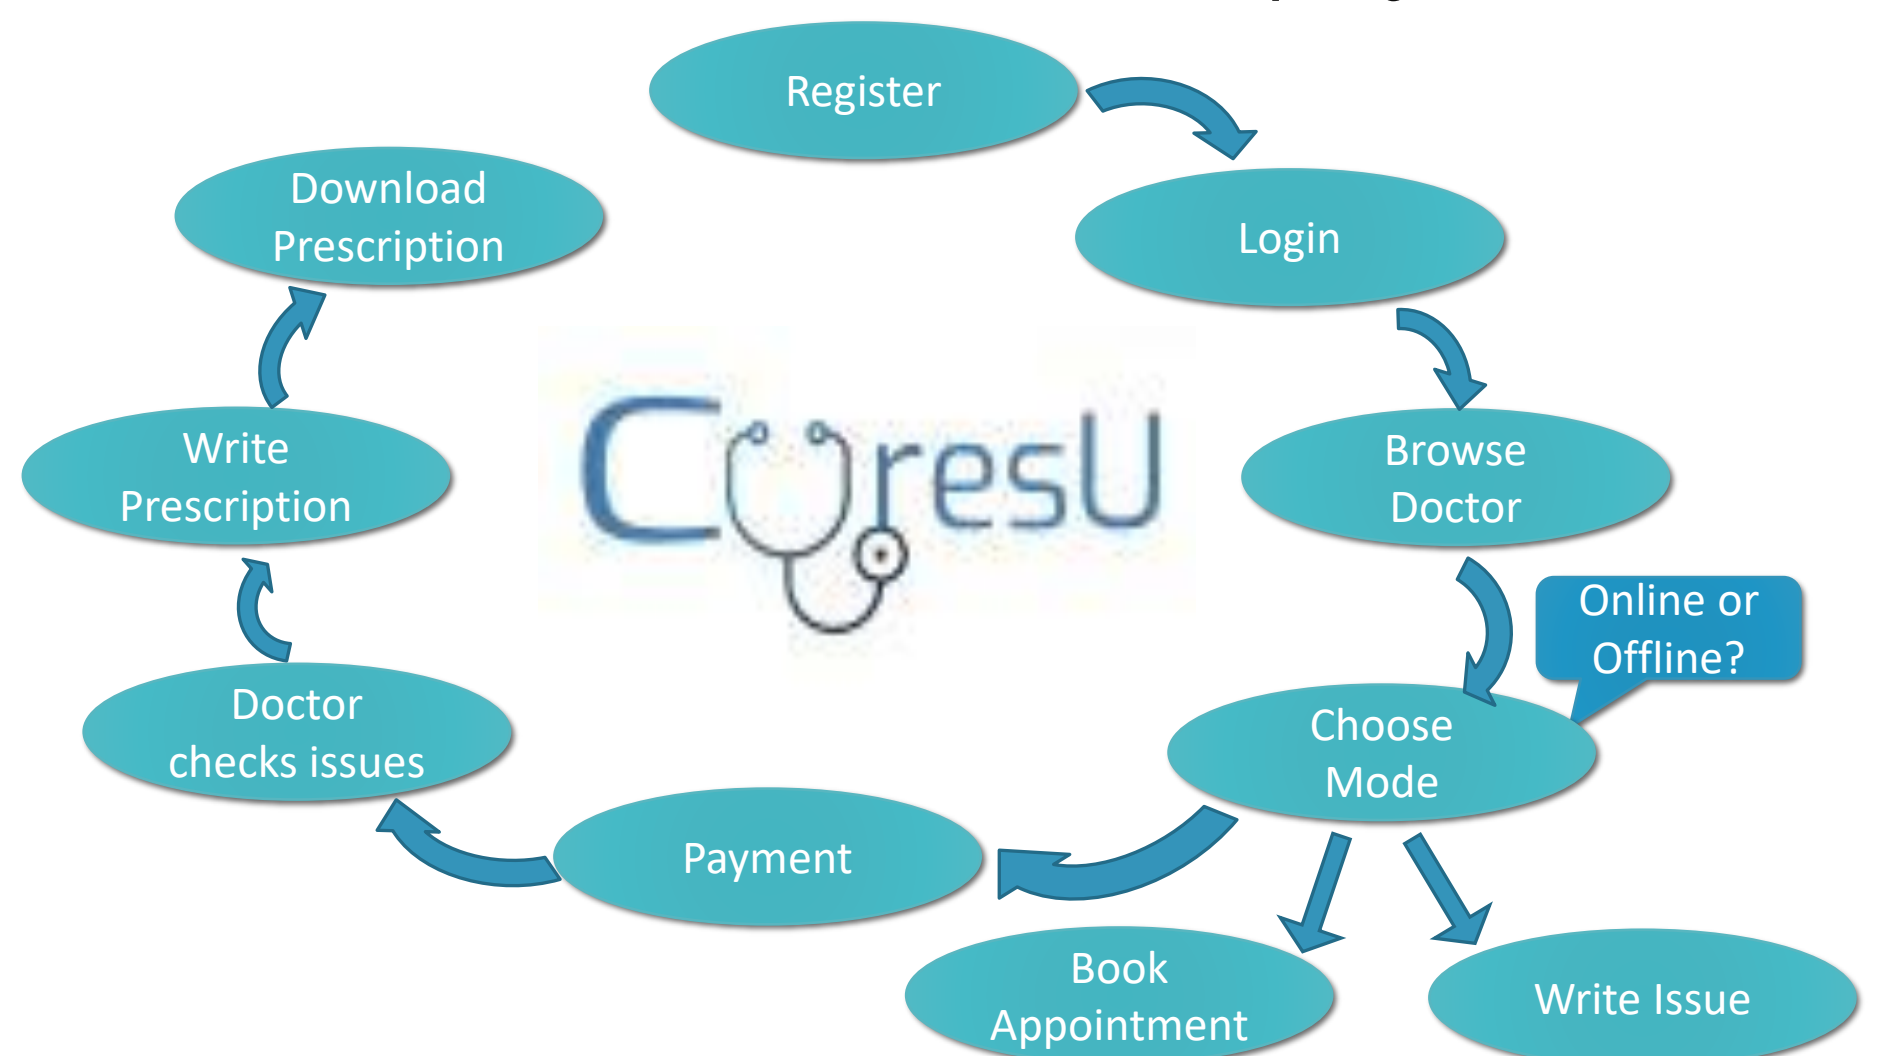

Introduction

- This Project was made for Appointment Booking for offline as well as online for getting treatment from home which can be very helpful in this Pandemic situation.
- Here we provide a platform for doctor to view the issues and prescribe the treatment accordingly.
- We also provide feasible payment method using Paytm developer platform.

Objectives

- This Project ensures reliable Doctors.
- People will be able to consult to the Doctor without moving out of their House.
- Patients who booked online Appointment can download the prescription pdf at any point of time.
- Below is shown the flow of our project in short:

Lessons Learned

- Using Javax API for mailing, which is really easy to use.
- How to manage the slots of Doctor appointments based on availability.
- PDF generation using itextPdf API for generating Prescription pdf.
